

To whom it may concern:

It is a distinct pleasure to introduce and recommend DigitalSafe. DigitalSafe is a Denver-based luxury safe fabricator that specializes in supplying custom closet companies and custom home builders nationally, and I have been delighted with how popular these safes have been with our customers.

These safes install quickly and easily between standard wall studs and they are the only wall safes I have found that come in both black and off-white to match any closet we design. I've also found the other bells & whistles to be a hit with customers, including an interior light, jewelry trays, moveable shelves and a plush velvet lining. In fact, the safe is such a strong interactive sales tool that we installed one in our showroom.

Further, the customer service DigitalSafe has provided both to me and to my customers has been beyond my expectations. The 1-800 phone number on the safes allows direct access to product support 24/7, so my customers don't call me if they need to change the batteries.

More importantly, I am impressed with what DigitalSafe has been able to add to my bottom line. By simply introducing the product to my customers, I have seen a consistent increase in accessory sales. I encourage you to share the enclosed brochures with your customers who are in the market.

Best regards,

Isaiah Rozek
Director of Operations & New Construction
